Aspen HD Rigid Core

Product Guide

Sustainability

Not just a good thing, it's the right thing.

Aspen Flooring believes it is our responsibility to help make this planet a better place – for our customers, our employees, our communities, and all the other living creatures we share it with. That's why our flooring is created to not only minimize our carbon footprint and impact on the environment, but to also foster a deeper appreciation for the beauty of the natural world.

Our Waterproof HD Rigid Core Luxury Vinyl Plank Flooring offers the perfect combination of beauty, durability, and functionality.

Crafted to handle the challenges of daily life, it features a rigid core that ensures superior stability, making it ideal for high-traffic areas such as kitchens, bathrooms, and living rooms. The 100% waterproof construction means it stands up to spills, moisture, and humidity, offering long-lasting performance even in the most demanding environments.

The flooring is designed to resist scratches and dents, providing a tough, durable surface that's perfect for homes with pets and kids. The high-definition visuals capture the authentic look and texture of natural wood, giving your space a luxurious aesthetic without the need for constant upkeep. Installation is made easy with its innovative click-lock system, making it a great option for both DIY projects and professional installations. The built-in underlayment provides added comfort underfoot and reduces noise, creating a quieter and more comfortable living environment. With minimal maintenance required, this flooring retains its pristine appearance for years to come, making it a perfect blend of elegance and practicality.
